SCOPE OF JOURNAL

Advances in Tropical Biodiversity and Environmental Sciences (ATBES) is a peer-reviewed journal devoted to the advancement and dissemination of scientific knowledge concerning tropical biodiversity and environmental sciences throughout the world for researchers and professionals. The scope of the journal is wide and multidisciplinary and publishes original research papers, review articles, as well as conceptual, technical, and methodological papers on all aspects including research findings, experimental design, analysis, and recent application in tropical biodiversity and environmental science studies. This journal is published in English and is distributed worldwide. It covers scientific and technological aspects from all fields that have general relevance to tropical biodiversity and environmental sciences including investigations on tropical biodiversity, systematics and taxonomy, terrestrial and aquatic ecology, wildlife management and control, ethnobotany and ethnozoology, tropical plant and animal cultivation, natural product chemistry, ecotourism, environmental remediation and management, and geographic information system (GIS), remote sensing and other modeling application for environmental studies.

ABOUT JOURNAL

Advances in Tropical Biodiversity and Environmental Sciences (ATBES) is a scientific journal published in 2017. The journal consistently publishes three times a year (February, June, and October). The journal is registered in Google Scholars, SINTA 4, and Dimensions. ATBES is employing a Cross-Check Ref to prevent any suspected plagiarism in the manuscripts.
