A Scientific Journal of Civil Engineering

FOREWORD

We express our gratitude to God Almighty for the publication of the Civil Engineering Scientific Journal Vol. 29, No. 2, September 2025. This edition features ten articles: 2 in the field of transportation engineering, 4 in water resource engineering, 1 in infrastructure & construction management, and 3 in geotechnical engineering. The topics covered in this edition come from four areas of civil engineering expertise, and we hope to see contributions with a wider range of topics from other areas of expertise in future editions

This is a brief introduction, and we hope this journal continues to be published with ever-improving quality and serves as a benefit to institutions, the nation, and the country. We continue to welcome contributions from various circles, including academics, research institutions, and practitioners, so that this journal can truly be utilized as a medium for exchanging technical information. Finally, we look forward to receiving valuable suggestions and constructive criticism for the publication of the next edition of the journal.

Thank you
